Hi Kiona. I'm attaching a few files for the Tree Mortality project.

- Read\_Me.txt: text file describing the other files
- MortalitySites.csv: csv with site-level information
- RingWidths.csv: csv with ring-level data
- SpeciesTable.csv: csv with table of species numbers (1-23) and names

What still needs to happen is the following:

- Try to get Ali Macalady's data to add to this dataset (I will send her another email)
- Download climate data (CRU would be best, as far as I know) for each site. The MortalitySites.csv file has lat/long for each site so can be used for this.

And then I think it's ready to go!

Let me know if any questions come up.

Larissa
